MOST ASTONISHING
CANYONS, RANGES,
GLACIERS,
GEYSERS AND WILDLIFE?**

**THEN DO NOT WASTE YOUR
TIME ANYMORE AND BOOK
YOUR FLIGHTS TO THE
ROCKY MOUNTAINS!**

Bryce Canyon National Park

Would you like to see something astonishing, or maybe you just like to camp?

Bryce Canyon National Park is located in southwestern Utah. Unlike its name it's not actually a canyon, it's more of a collection of geological formations. It is known for its hoodoos, which are tall columns of soft rock formed by erosion or frost weathering.

The Park sits at 2400-2700 m above sea level.

There are 2 campgrounds available, where you can stay in your caravan or tent, but the Bryce Canyon Lodge (a 114- room complex) is also an option if you want to stay for the night.

Glacier National Park

If you like quality time in nature, come and experience Glacier's pristine forests, alpine meadows, rugged mountains, and spectacular lakes. The park is considered one of the most diverse with more than 700 miles of trails, ranging from calm slopes to extreme adrenalin trips on steep ranges.

Relieve the days of old times through historic chalets, lodges, and the famous Going-to-the-Sun Road. Explore Glacier National Park and discover what awaits you.

Yellowstone National Park

If you think about Yellowstone, what is the first thought that comes to your mind? Is that thought makes you anxious, because you have heard it can erupt and end the world we live in?

Well, I can assure you it is very unlikely to erupt within 10000 years, so I would like to inform you why it is the best national park to visit. With an area of 9000 square kilometers and 4 million visitors each year, these numbers are telling us why this place is a must to visit. There are astonishing lakes, canyons, rivers, mountain ranges and also springs. The wildlife is also unique there. Many endangered animals live there and the beautiful vegetation is also worth mentioning.
tip: Beware of bears, and springs and geysers.

Visit the Mile High City!

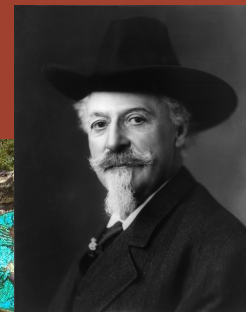

Have you ever thought of being exactly one mile high? Are you interested in the Old West and rascallions such as Buffalo Bill and mythical creatures called Tommy Knawkers? If your answer is yes, then you must spring up in the Mile High City!

Denver; an early cradle for mining and gold rush in the 19th century. The city includes the gold-domed Colorado State Capitol, which is just as astonishing as its big brother in Washington D.C.

Once, you are within the building, it's a must to reach out to its 13th step! After this incredible deed you can bravely declare: 'I'm exactly one mile above sea level!'

Since the image of the Old West is fairly intertwined with the westward railroad expansion, the city offers you the Colorado Railroad Museum with over 100 different locomotives on a 15-acre railyard.

On the other hand, the fans of arts, museums and hiking tours won't be let down! Don't wait, book your accommodation now and search for the trains' whistle!

Rocky Mountain National Park

Rocky Mountain National Park is among the biggest and most adventurous places you can visit in North America.

It has 355 miles of hiking trails that range from flat lakeside strolls to steep mountain peak climbs.

True driving enthusiasts can enjoy diverse ecosystems characterizing the higher regions of the central Rocky Mountains. The roads take visitors through lowland meadows and aspen groves.

The park's great large-animal population makes it one of the country's top wildlife watching destinations.

Tips for travellers:

- Do not forget your Thomas fanatic T-shirt at home, if you happen to spring in the Colorado Railroad Museum!
- Make sure that your tent is waterproof unless you want to shower while you are asleep!
- Bring warm clothes if you want to visit Rocky Mountains in the winter.
- Make sure to pack the most comfortable hiking shoes because you will be walking a lot in the biggest national parks in North America.
- Beware of geysers!
